

Cold Chain

Offering cGMP cold chain storage, labelling and distribution capabilities for biopharmaceuticals and clinical trial materials

Providing an important link in the temperature-controlled supply chain

At Jones, patient and medication safety is at the heart of our business. Our sound quality systems and unique clean room environment ensure the highest level of protection for the many global brands who have long trusted their products to Jones.

And, as the share of biologic-based drugs in the global pharmaceutical market continues to rise, we are here to ensure the safety, efficacy and quality of our customers' temperature-sensitive drugs and biological products.

In compliance with the current Good Manufacturing Practices (cGMP) environment to which all drugs and biological products are required to adhere, our secure FDA and Health Canada-inspected facility houses a cold chain storage area that allows for the import and distribution of clinical trial materials (CTMs) and finished specialized pharmaceutical products.

Commercial Products

- Storage – Walk-in refrigerator validated at 2 – 8°C
- Labelling – Ability to import products and specifically label for Canadian market consumption
- Secondary packaging – Kitting of vials and ampoules for commercial sale

Clinical Trial Materials

- Import, storage and distribution
- Inventory management
- Temperature monitoring within pre-qualified shipping containers
- Chain of signatures and specialized courier services available

Contact us today at packaging@jonespackaging.com to learn more about our cold chain capabilities and how we can ensure the protection and secure transition of your products as they move through the supply chain.

Let us show you how easy it is to trust your packaging business to Jones.
