

Taking medication management to the next level

FlexRx™: Unprecedented flexibility for pharmacists and patients

Since Jones co-developed the first blister card to address multi-medication regimes more than 30 years ago, we have continued to demonstrate an unwavering commitment to driving innovation and patient safety in the Canadian medication management market. The FlexRx™ adherence solution is no exception.

Bringing together the best attributes from our vast line of adherence products, FlexRx offers a wide range of benefits and flexibility for pharmacists and patients alike – from retail pharmacy to long-term care. Plus, the unique FlexRx adherence solution can accommodate any pharmacy medication dispensing process, whether manual or automated.

And, like our entire line of adherence packaging and pharmacy consumable products, FlexRx is fully customizable, allowing you to showcase your brand in a cost-effective way to achieve customer recognition and grow your business.

- Optional cover protects medication while offering an important branding opportunity - FlexRx™ Light version without a cover also available
- Can be used in both manual and automation filling modes to accommodate all dispensing processes
- Ideal for patients in the community, as well as in long-term care
- Perforated blister cavities offer 'on-the-go' portability
- Rounded edges on blister cavity create an easy-to-use medication cup
- Optional blister with integrated hooks for hanging
- Medication information printed on each individual time pass so patients always know what's inside
- Permanent adhesive label with convenient push-through access to medications
- Large-capacity blisters for multiple medications and vitamins, providing an opportunity to capture incremental over-the-counter product sales
