

Adherence packaging repair tape

A simple solution for updates and corrections

From medication schedule updates to dose corrections, you may occasionally need to re-seal a patient’s adherence package after it has already been prepared.

With its easy-to-apply design and convenient perforations, our selection of repair tape allows you to make updates quickly and effectively, while maintaining tamper-evidence and a professional look for the updated package.

Repair tape is available in multiple sizes and designs to work with the most widely used Jones adherence solutions.
