Quality assurance and sustainability go hand in hand

Jones sets the bar high in an ongoing commitment to quality and the environment

Over the years, we have consistently achieved and exceeded important industry and international standards and best practices to solidify our status as a world-class operation. And, as an industry leader, we not only set these high standards for ourselves to uphold but also for others to follow.

We are proud to have been the first folding carton company in Canada to be registered ISO 9001, which led to the implementation of our Quality Management System.

With clients across a number of highly regulated industries such as health and beauty, pharmaceutical, nutraceutical, and food and beverage, Jones takes pride in maintaining stringent standards to meet their requirements. From regular client and supplier audits to certification audits and ongoing internal process evaluations, the commitment to quality assurance and quality products is a mindset that is shared across the entire Jones organization. This is what sets us apart.
Our Quality Assurance team, made up of a number of employees who are trained internal auditors, plays a fundamental role maintaining and enhancing our ISO 9001-based Quality Management System, which also incorporates cGMP, as well as our Health, Safety and Environmental Management Systems. While previously registered to ISO 14001 and OHSAS 18001 for several years, we currently exercise the “self-declaration” option outlined by these standards.

**Embracing our commitment to sustainability**

Our commitment to quality doesn’t stop there – we also embrace our responsibility for the impact of our activities on the environment, employees, communities, consumers and all of our stakeholders. Our award-winning GreenSweep™ service helps our clients explore and deploy the most advanced sustainability-focused, low footprint packaging options available. By reducing energy and material use and optimizing recyclability we have won industry accolades. More importantly, we have won consumer respect for our clients.

In addition to our robust environmental management system designed to meet the requirements of ISO 14001, we received certification for the following chain of custody initiatives for paper/paperboard:

- The Forest Stewardship Council (FSC)
- The Sustainable Forestry Initiative (SFI)
- Gold Award and four Citations for Sustainable Leadership by the Packaging Association of Canada

*Let us show you how easy it is to trust your packaging business to Jones.*
